TRIANGLE®

INX Digital is happy to provide you with our new 2012 TRIANGLE® Alternative Inks catalog. Within these pages you will find a complete listing of all TRIANGLE® products, grouped by market segment (Wide Format, Superwide Format, UV Curable, Liquid Laminate). In an effort to reduce confusion, we also include the compatibility of each ink to specific equipment types as well as electronics. Need order codes, color availability, packaging information?

It's all included per product!

TRIANGLE® brand is the global leader of alternative inks. This status has not been reached without the help of dealers and distributors such as yourselves. INX Digital relies on our channel partners to embrace the TRIANGLE® brand and beliefs and match them against OEM products daily in the marketplace. It is with the support of our channel partners we continue to make strides forward with new, innovative, quality products and gain market share globally.

Thank you for being an integral part of the success TRIANGLE® has seen and will continue to see. With an unsurpassed Global Dealer Network we will all continue to profit from our partnerships.

Sincerely,
Ken Kisner, President of INX Digital

PRODUCT AVAILABILITY

As a truly global company, INX Digital offers services and manufacturing with its operations located in the United States (USA), Italy, Czech Republic (EU) and China. All products included in this version of the catalog show availability per manufacturing location; represented by a green dot (in stock), yellow dot (special order), or red dot (not available).

COLOR COMPATIBLE

COLOR COMPATIBLE

Look for our new color compatible logo on our new launches! Our Triangle brand is now launching a series of color compatible products. We have set a new standard internally for color compatibility with OEM profiles. When you see this logo on our literature or label you can feel at ease that we have raised the bar on simplicity for changing to a Triangle product.

CHEMICALLY COMPATIBLE

CHEMICALLY COMPATIBLE

We are also looking to make your change-overs to Triangle branded products easy with chemically compatible products. We have developed a new series of tests to assure that our products are forward compatible (Our cartridge being inserted after the OEM) and backward compatible (the OEM ink being reloaded over our ink). This allows our users to feel a reduced risk in trying our inks.

REACH

reach
pre-registered

INX Digital has successfully completed a major portion of its strategic objectives for complying with REACH relative to the phase-in substance pre-registration period that has now expired. We have evaluated and accounted through extensive supply chain discussions the REACH level substances. There are multiple scenarios that can exist in this supply chain, and multiple solutions that implemented to secure our product line portfolio for our customers.

2-YEAR DURABILITY

2YR

Outdoor durability for the purpose of this statement is defined as no appreciable visual deterioration of the printed image when viewed from its intended viewing distance. These inks, TRIANGLE®'s premier outdoor durable inks designed to withstand outdoor exposure for up to two years, are backed by our original Worldwide Outdoor Durability Warranty for TRIANGLE® inks. See warranty for complete details.

1-YEAR DURABILITY

1YR

Our one-year durable product is intended for short term outdoor graphics and is expected to last up to one year depending on ambient conditions. To better match the needs of specific markets, certain TRIANGLE® inks are now available in a one year durability level. These inks are for use with outdoor graphics that will not be outdoors for more than one year.

RESEARCH
& DEVELOPEMENT

TRUE SOLVENT

Our TRIANGLE® brand of True solvent inks are formulated as industrial, cost-effective production inks. These inks are vinyl polymer-based with a high-solubility solvent system allowing the ink to penetrate into the substrate creating unparalleled adhesion and durability. They are formulated with commodity solvents with good price structure. We have developed XJS800, our own specialized pigment dispersion technology designed around automotive pigments. These nanoparticle sub micron pigments are automotive grade and encapsulated in customized polymers for incredibly reliable and stable formulations. These inks are specially formulated for fast dry times yet enough open time to not cause surface cure in the nozzle orifice. We are known for our bright yellow, strong cyan, wide gamut magenta and jet four-color blacks.

ECO SOLVENT

Our TRIANGLE® brand of Eco solvent inks are formulated with special attention to environmental impact, human health and safety, and regulatory concerns. INX Digital has set the standard on Eco inks. We have internally set criteria with which we grade every Eco ink. These criteria include odor, Hazardous Air Pollutants, reproductive toxicity, non monogenic, VOC, Environmental Fate, OSHA Threshold limits. TRIANGLE® Brand of Eco Solvent inks have extremely low odor. We use our internally designed XJS950 dispersion line which has a particularly narrow particle size distribution. This consistency of particle shape and size allows consistent drop formation and a reliable meniscus reaction. The custom polymers designed for our Eco line is carefully made and classified to have a narrow molecular weight distribution. The solvent mixture was carefully balanced to optimize polymer solvency, creating a high level of formulation stability.

BIO SOLVENT

Our TRIANGLE® brand of Bio products utilizes renewable resource content. Reducing our reliability on non renewable resources such as crude-based products drives our business towards sustainability. We believe that constantly driving towards more sustainable business practices and sustainable products is not only important but part of our moral responsibility. It is also extremely important for the environment for products to have a long, useful life and to meet customer demands for their end uses. Triangle's Bio product line carefully balances the long-term needs and stability of the product while maximizing sustainability.

MILD SOLVENT

Our TRIANGLE® brand of Mild solvent products are cyclohexanone free, have reduced odor and yet have a solvency package that still allows for the use of vinyl copolymers which give excellent outdoor durability, scratch resistance and alcohol resistance. These Mild solvent inks have excellent adhesion characteristics to a wide variety of media and generally have a fast dry rate.

WATER BASED

Our TRIANGLE® brand of water-based inks are dye or pigment based and designed for use on receptive media with a micro-porous surface that is highly absorbent of the ink. Although dye-based inks result in brighter, more vibrant colors, pigmented inks offer a greater resistance to UV light, translating to greater resistance to fading when exposed to sunlight. Most water-based inkjet inks are not waterproof, making a treatment with a laminate or other protective coating necessary.

UV CURABLE

Our TRIANGLE® brand of UV Curable products are formulated to meet a variety of machine specific applications. These industrial, production inks use our internally designed XJS350 dispersion line which boasts strong, bright, vivid colors. Additionally these automotive-grade pigments have excellent color fastness (outdoor fade resistance) and a particularly narrow particle size distribution. The small particle size aids in ultimate up time for your printer with consistent drop formation and fewer dropouts caused by air entrapment in the piezo channel. We utilize a variety of monomers as well as integrate unique polymer technology that gives the TRIANGLE® brand of product unique performance on a wide variety of media.

WIDE
FORMAT INKJET INK

INK TRAIN WARRANTY

INX Digital offers the most comprehensive warranty in the industry. If inks are proven to be the cause of the printer breakdown during the initial OEM warranty period, then INX Digital will provide parts, service or reimbursement costs required to repair damage to the ink train.*
*See warranty disclosure statement for details.

OUTDOOR DURABILITY WARRANTY

INX Digital backs its two-year products with its Worldwide Ink Durability Warranty. INX Digital's TRIANGLE® Inks have been extensively used for many years and exposed to virtually all global and outdoor climates.*
*See specific product durability warranties as some vary.
Ask a sales representative for INX Digital's complete Worldwide Ink Durability Warranty.

COLOR CENTER

INX Digital provides custom profiles to our customers. Every print shop is unique in its set up just as every printer is slightly different from the other. For this reason we offer to create custom profiles for our customers' various needs.
For additional info: **techsupport.global@INXdigital.com**

TECH SUPPORT

Have any questions or issues that need to be resolved? We respond to all inquiries within 48 hours.
For additional info: **techsupport.global@INXdigital.com**

SPARE PARTS

INX Digital offers common replacement parts (at a significant savings over the OEM) for many of the printers that it manufactures ink for. These parts are the same parts that are sourced by the manufacturers themselves, refurbished, or are re-sourced to solve known problems.
For additional info: **techsupport.global@INXdigital.com**

COLOR COMPATIBLE

Look for our new Color Compatible logo on our new launches! Our TRIANGLE® brand is now launching a series of color compatible products. We have set a new standard internally for color compatibility with OEM profiles. When you see this logo on our literature or label you can feel at ease that we have raised the bar on simplicity for changing to a Triangle product.

In the near future you may be able to "choose your color gamut" with TRIANGLE® wide format line to meet your need. This is in addition to being able to choose your chemical technology such as Bio, Eco or True solvent.

CHEMICALLY COMPATIBLE

We are also looking to make your change-overs to TRIANGLE® brand products easy with chemically compatible products. We have developed a new series of tests to assure that our products are forward compatible (our cartridge being inserted after the OEM) and backward compatible (the OEM ink being reloaded over our ink). This allows our users to feel a reduced risk in trying our inks.

EASYRESET

EasyReset is an automatic chip-emulation system, that replaces OEM chips. Every time you start the printer it generates a new code that takes the virtual ink level to 100% (440 ml per cartridge). Each time you need to replace a cartridge, following the printer user manual, the virtual ink value has to be restored to 100%. To do that, you need to restart your printer. When the machine is restarted the virtual ink value will be back to 100%.

ECOBK.JV33.PLUS
BULK INK SYSTEM

Eco Bulk is our new ink delivery system for wide format inks that takes a more sustainable approach compared to plastic cartridges while maintaining easy of use. With a unique cardboard design, it is comprised of one box instead of five, 440 ml cartridges and houses the ink within a foil bag. Once emptied, the bag is disposed of and replaced. The foil bag can contain up to two liters of ink, double the current industry standard of one liter packaging which results in less waste. Additionally, a test program showed that more volume allows for greater consistency of the product being delivered through the network. Contact your sales representative to see if Eco Bulk fits your workflow!

THIS BULK INK SYSTEM INCLUDES:

ECOBK.JV5.PLUS
BULK INK SYSTEM

Eco Bulk is our new ink delivery system for wide format inks that takes a more sustainable approach compared to plastic cartridges while maintaining easy of use. With a unique cardboard design, it is comprised of one box instead of five, 440 ml cartridges and houses the ink within a foil bag. Once emptied, the bag is disposed of and replaced. The foil bag can contain up to two liters of ink, double the current industry standard of one liter packaging which results in less waste. Additionally, a test program showed that more volume allows for greater consistency of the product being delivered through the network. Contact your sales representative to see if Eco Bulk fits your workflow!

THIS BULK INK SYSTEM INCLUDES:

ECOBK.JV5
Bulk ink system
(To be used with Resetter)

ERJ54
EasyResetV3 is an automatic
chip-emulation system

EASYRESET

EasyReset is an automatic chip-emulation system, that replaces OEM chips. Every time you start the printer it generates a new code that takes the virtual ink level to 100% (440 ml per cartridge). Each time you need to replace a cartridge, following the printer user manual, the virtual ink value has to be restored to 100%. To do that, you need to restart your printer. When the machine is restarted the virtual ink value will be back to 100%.

(Vertical Version, 4 Tanks with 4 cartridges)

EASYRESET

EasyReset is an automatic chip-emulation system, that replaces OEM chips. Every time you start the printer it generates a new code that takes the virtual ink level to 100% (440 ml per cartridge). Each time you need to replace a cartridge, following the printer user manual, the virtual ink value has to be restored to 100%. To do that, you need to restart your printer. When the machine is restarted the virtual ink value will be back to 100%.

Firmware version listed are current through Dec. 31, 2011. Please consult the online catalog for most up-to-date information: http://www.triangleinx.com/e-catalog/

ENVIRONMENTALLY RESPONSIBLE NANO DISPERSED DYE DIGITAL INKS FOR DIRECT TO TEXTILE PRINTING

TRIANGLE® waterbased textile inks DTX are designed for digital printers utilizing piezo print head technology. These inks are intended for direct-to-textile printing on polyester or mixed synthetic fabrics that contain a minimum of 60% polyester. In the direct-to-textile printing method, images are printed directly onto the fabric and are subsequently put through a process of thermo-fixation. With our textile inks you will see:

• Vibrant colors
• Long shelf life
• Optimal jettability
• Superior image definition
• Excellent fastness properties

APPLICATION

The market that we have focused on for the DTX textile inks is flag and banner. These TRIANGLE® inks will perform optimally when printing direct to polyester banners and flags on treated fabrics.

THERMOFIXING CONDITIONS

Thermo-fixing can occur by means of a press or a calendar. The temperature and time for thermo-fixing varies depending on the chemical-physical characteristics of the substrate being printed.

COLOR	TEMPERATURE/HEAT SETTING	UV LIGHT DURABILITY*	WASHING DURABILITY*
Cyan	170°C - 210°C	5/7	4/5
Magenta	170°C - 210°C	6/7	5
Yellow	170°C - 210°C	6/7	4/5
Black	170°C - 210°C	6	5
Light Cyan	170°C - 210°C	5/6	4/5
Light Magenta	170°C - 210°C	6/7	5

*Durability is based on a scale of 1 - 8.

NOTE: This information has been carefully studied from experience gained in the laboratory and under commercial situations. It is subject to change without notice. All sales are subject to our standard terms and conditions of sale. Since applications for this product vary tremendously, the user assumes the obligation to test this product in their specific situation to determine its suitability and assumes all risk and liability related to such use. INX Digital makes no warranty, express or implied, for the use of the product for any particular application. In no event shall INX Digital be liable for damages in excess of the original cost of the product nor shall INX Digital be liable for any special or consequential damages.

Need to clean?

INX Digital is employing a new, patent-pending technology, proving that up to 100% recovery on Solvent print heads with obstructed nozzles and restricted flow is possible. This advance in print head cleaning, available for virtually all print head types, translates to major savings for digital print operations.

SUPERWIDE
FORMAT INKJET INK

INK TRAIN WARRANTY
INX Digital offers the most comprehensive warranty in the industry. If inks are proven to be the cause of the printer breakdown during the initial OEM warranty period, then INX Digital will provide parts, service or reimbursement costs required to repair damage to the ink train.*
*See warranty disclosure statement for details.

OUTDOOR DURABILITY WARRANTY
INX Digital backs its two-year products with its Worldwide Ink Durability Warranty. INX Digital's TRIANGLE® Inks have been extensively used for many years and exposed to virtually all global and outdoor climates.*
*See specific product durability warranties as some vary.
Ask a sales representative for INX Digital's complete Worldwide Ink Durability Warranty.

COLOR CENTER
INX Digital provides custom profiles to our customers. Every print shop is unique in its set up just as every printer is slightly different from the other. For this reason we offer to create custom profiles for our customers' various needs.
For additional info: **techsupport.global@INXdigital.com**

TECH SUPPORT
Have any questions or issues that need to be resolved? We respond to all inquiries within 48 hours.
For additional info: **techsupport.global@INXdigital.com**

SPARE PARTS
INX Digital offers common replacement parts (at a significant savings over the OEM) for many of the printers that it manufactures ink for. These parts are the same parts that are sourced by the manufacturers themselves, refurbished, or are re-sourced to solve known problems.
For additional info: **techsupport.global@INXdigital.com**

COLOR COMPATIBLE
Look for our new Color Compatible logo on our new launches! Our TRIANGLE® brand is now launching a series of color compatible products. We have set a new standard internally for color compatibility with OEM profiles. When you see this logo on our literature or label you can feel at ease that we have raised the bar on simplicity for changing to a Triangle product.

In the near future you may be able to "choose your color gamut" with TRIANGLE® wide format line to meet your need. This is in addition to being able to choose your chemical technology such as Bio, Eco or True solvent.

CHEMICALLY COMPATIBLE
We are also looking to make your change-overs to TRIANGLE® brand products easy with chemically compatible products. We have developed a new series of tests to assure that our products are forward compatible (our cartridge being inserted after the OEM) and backward compatible (the OEM ink being reloaded over our ink). This allows our users to feel a reduced risk in trying our inks.

SMARTINX.COM
Get you and your coworkers trained at **smartINX.com**, INX Digital's new e-training portal. Learn the technical nuances of inkjet printing, how to sell alternative ink, and much more. Email **info@INXdigital.com** to request your username today!

1334110-05LT **5lt Bottle Magenta HD**

TBO (111) – HD – High Density solvent ink for the Turbojet was designed to give long lasting outdoor UV protection by design. This Magenta will still give a deep rich series of reds and oranges as well as blues. When looking for fade resistance for car wraps you should suggest for your clients to use this Magenta.

1312182-05LT **5lt Bottle Magenta HC**

TBO (112) – HC – High Chroma solvent ink for Turbojet is designed to provide the largest color gamut. By using HC magenta end-users will get rich reds, brilliant pinks, oranges and bright Blues even on low cost paper stock. Short term paper prints and/or billboards will have an even greater impact when printing with our HC ink.

What are you waiting for?
Start saving now with TRIANGLE®!

TRIANGLE®

Leading the way with new, advanced inks to match virtually every OEM printer and print head type, an unsurpassed Global Dealer Network offering full technical training and local technical support to all customers, Triangle redefines "value added." Whether you are looking for UV curable, solvent, or mild solvent inks, bulk ink delivery systems, liquid laminates, or printer hardware, Triangle has a MONEY SAVING solution to fit your needs.

TriangleINX.com

UV CURABLE
INKJET INK

INK TRAIN WARRANTY
INX Digital offers the most comprehensive warranty in the industry. If inks are proven to be the cause of the printer breakdown during the initial OEM warranty period, then INX Digital will provide parts, service or reimbursement costs required to repair damage to the ink train.*
*See warranty disclosure statement for details.

OUTDOOR DURABILITY WARRANTY
INX Digital backs its two-year products with its Worldwide Ink Durability Warranty. INX Digital's TRIANGLE® Inks have been extensively used for many years and exposed to virtually all global and outdoor climates.*
*See specific product durability warranties as some vary.
Ask a sales representative for INX Digital's complete Worldwide Ink Durability Warranty.

COLOR CENTER
INX Digital provides custom profiles to our customers. Every print shop is unique in its set up just as every printer is slightly different from the other. For this reason we offer to create custom profiles for our customers' various needs.
For additional info: **techsupport.global@INXdigital.com**

TECH SUPPORT
Have any questions or issues that need to be resolved? We respond to all inquiries within 48 hours.
For additional info: **techsupport.global@INXdigital.com**

SPARE PARTS
INX Digital offers common replacement parts (at a significant savings over the OEM) for many of the printers that it manufactures ink for. These parts are the same parts that are sourced by the manufacturers themselves, refurbished, or are re-sourced to solve known problems.
For additional info: **techsupport.global@INXdigital.com**

COLOR COMPATIBLE
Look for our new Color Compatible logo on our new launches! Our TRIANGLE® brand is now launching a series of color compatible products. We have set a new standard internally for color compatibility with OEM profiles. When you see this logo on our literature or label you can feel at ease that we have raised the bar on simplicity for changing to a Triangle product.

In the near future you may be able to "choose your color gamut" with TRIANGLE® wide format line to meet your need. This is in addition to being able to choose your chemical technology such as Bio, Eco or True solvent.

CHEMICALLY COMPATIBLE
We are also looking to make your change-overs to TRIANGLE® brand products easy with chemically compatible products. We have developed a new series of tests to assure that our products are forward compatible (our cartridge being inserted after the OEM) and backward compatible (the OEM ink being reloaded over our ink). This allows our users to feel a reduced risk in trying our inks.

SMARTINX.COM
Get you and your coworkers trained at **smartINX.com**, INX Digital's new e-training portal. Learn the technical nuances of inkjet printing, how to sell alternative ink, and much more. Email **info@INXdigital.com** to request your username today!

BEFORE PRINTING
BONDAID 1
SOLVENT BASED ADHESION PROMOTER FOR UV CURABLE PRINTS ON METAL, GLASS, AND TILE.

▼ Designed to improve adhesion on metal, glass, and tile
▼ Acts as a general cleanser prior to printing
▼ Reduces static electricity on the surface
▼ Reduces ink drop deflection
▼ Reduces the potential for new particles being attracted to the substrate during printing
▼ Always test the results of this product on your specific substrate using your application method prior to using in production
▼ 500ml bottle

ORDER CODES ● ●
2 x 500 ml Bottle. Net quantity 1 liter.

LIQUID LAMNINATES

WHAT ARE LIQUID LAMINATES

TRIANGLE® Liquid Laminates are a series of products from INX Digital designed specifically to protect prints from UV light and other environmental effects. There are solvent-based and aqueous-based products to protect respectively water-based and solvent-based prints.TRIANGLE® Liquid Laminates are of the highest quality, giving your prints the best protection.

WHY LIQUID LAMINATES

TRIANGLE® Laminates protect digitally produced images from abrasion, water, and premature fading while maintaining the flexibility and elasticity of the media; they are weldable. They also "pop" the colors, giving a wet look to the print. While providing these features TRIANGLE® Liquid Laminates also maintain a lower cost per square meter in comparison to hard laminates.

UV PROTECTION

TRIANGLE® has set new higher standards in quality with their Liquid Laminates: blocking 99% of light by utilizing current "state-of-the art" methods in UV protection; UVA (Ultra Violet Absorber) and HALS (Hindered Amine Light Stabilizers). When used in accordance with TRIANGLE® inks, your print job's lifetime will be extended.

HOW TO APPLY LIQUID LAMINATES

TRIANGLE® Liquid Laminates can be applied using various methods depending on the type of coating and substrate being utilized: automated coaters, brushing, rolling, or spraying are all viable options. To obtain optimal protection, it is recommended to apply the specified required amount of coating to the substrate (specific to product type). Follow the product applications instruction for best results. Always test before use.

D320 - D321 CLEARFLEX ME

AQUEOUS BASED LIQUID LAMINATE FOR TRUCK SIDE, FLEET, AND VEHICLE GRAPHICS

▼ Extremely durable
▼ Formulated for truck side and fleet graphics
▼ Minimizes dirt pickup
▼ Minimizes the effect of UV light transmission
▼ Minimizes the effect of oxidation, moisture, and temperature
▼ High abrasion resistance

CLEARFLEX ME GLOSS
Available in 1lt, 5lt and 20lt bottle.

1291275-01LT	1lt Bottle D320 Clearflex ME Gloss
1291275-05LT	5lt Bottle D320 Clearflex ME Gloss
1291275-20LT	20lt Bottle D320 Clearflex ME Gloss

CLEARFLEX ME SEMIGLOSS
Available in 1lt, 5lt and 20lt bottle.

| 1414011-01LT | 1lt Bottle D321 Semigloss |
| 1414011-05LT | 5lt Bottle D321 Semigloss |

D007 CRISTAL BOND
FLATBED UV CURABLE PROTECION

AQUEOUS BASED LIQUID LAMINATE FOR PROTECTION ON UV CURABLE PRINTS

▼ Formulated for adhering to and protecting UV curable inks
▼ Virtually eliminates directional banding (lawnmower effect)
▼ Minimizes the effect of UV light transmission
▼ Minimizes the effects of oxidation, moisture, and temperature
▼ High abrasion resistance
CRISTAL BOND
Available in 1lt, 5lt bottle.

MIMAKI® JV3™

KCV.2
Valves for Mimaki ® dummy cartridges and tube connection gasket included

CPNG
Solvent resistant capping for Mimaki ®

WPG
Wiper for Mimaki® solvent resistant.

SRS
Solvent resistant syringe (w/o rubber)

EFRF
Round filter for easyfill luer lock fitting included

SOLPH
Solvent resistant print head for Mimaki ®

UPH2
Upper head solvent resistant for Mimaki ® p/heads

WIP30
Fabric wiper to clean printers parts

DMPWIDE
Damper "Wide" screen solvent resistant for Mimaki®

DMPEPS
Damper solvent resistant for Mimaki®

DMPBIG.3
Damper "Big" solvent resistant for Mimaki® 3 mm in let tubing

DMPBIG.4
Damper "Big" solvent resistant for Mimaki ® 4 mm in let tubing

CAP
Capping adaptor to be used for Flushing Mimaki® capping unit

JV3CK
Mimaki ® chip kit for ECTG to extract contacts for external connection of chip

MMPMP.2
Pump for Mimaki ® solvent resistant

CPK
Capping cleaning kit for Mimaki® printers

RLS32
Solvent resistant tube semi-rigid ID mm 2 OD mm 3 (diamet er that fit into the Dumeper)

RLS427
Solvent resistant tube semi-rigid ID mm 2,7 OD mm 4

TYG2X4
Solvent resistant tube soft-tube ID mm2 OD mm4 - For use in perilstaltic pump

SWAB.1
Solvent resistant SWABS to clean printers parts in contact with inks (for printing cleaning procedures)

PPTS
Micro pipettes for printer maintanance (nozzle wash)

PMPK
Pump connection kit to easily connect pumps.

CTCN
Solvent resistant connection for empty cartridge valve and gasket included (for Dummy Cartridges)

ECTG
Solvent resistant empty cartridge, only plastic with chip location (for Dummy Cartridges)

ESUKA
New Battery device to suck and Spray flush

EF-FNN
Funnels for EasyFill PRO™

MKMCLK
Keep your printer clean and running 100% of the time
Mimaki JV3 Monthly Cleaning Kit
(10 swabs, 20wipes, cpk, 10 wiper, 4 pipette)

MIMAKI®

TECHNICAL SERVICE
& SUPPORT

Rapid-response, service-support. Cross-platform support is a part of the INX Digital package. This includes equipment parts as well as specialists who can service many printer makes and models. With an unsurpassed Global Dealer Network offering full technical training and local technical support to customers, INX Digital redefines "value added." INX Digital has broken down its main support system into four segments: Field Service, Head Cleaning, Color Management, and Printer Conversions.

INK CONVERSIONS

Onsite technicians are available to perform ink conversions to TRIANGLE® brand ink. This process includes benchmarking the printer prior to the ink conversion and removal of old ink, installation of TRIANGLE® ink and post-conversion proof prints. The ink train preparation will include a filter change and flushing of integral components to optimize installation of TRIANGLE® ink. The conversion may also include light maintenance and mechanical adjustments if needed. The conversion process requires a minimum two-day onsite technical visit by a qualified/authorized TRIANGLE® technician.

Order Codes AMERICAS	Order Codes	Service Description
18000FSDR	18900FSDR	Field service daily rate
18000FSST	18900FSST	Field service straight time (hourly)
18000FOT	18900FOT	Field service overtime
18000FSDT	18900FSDT	Field service double-time
18000TE	18900TE	Travel expenses

HEAD CLEANING

INX Digital is employing a new, patent-pending cleaning technology, offering an effective solution for solvent and UV curable print heads with obstructed nozzles and restricted flow. This advance in print head cleaning, available for virtually all print head types, translates to major savings for digital print operations. This service is designed for industrial print heads such as: Dimatix® (formally Spectra®), Xaar® 1001™, Ricoh®, Konica Minolta®, T-tec™, Kyocera®, and Jetrion® GT64™. This service is not suitable for disposable type print heads such as Xaar® 128/126™ and Epson®. For more information on our print head cleaning services please email: printheadcleaning@INXdigital.com.

Order Codes AMERICAS	Order Codes	Service Description
18000PH	18900PH	Print Head Cleaning TRIANGLE® ink
18000PH-NT	18900PH-NT	Print Head Cleaning non-TRIANGLE® ink
18000PHUV	18900PHUV	Print Head Cleaning UV TRIANGLE® ink
18000PHUV-NT	18900PHUV-NT	Print Head Cleaning UV non-TRIANGLE® ink

COLOR MANAGEMENT

More than just ink. INX Digital continues to strive to meet the demands of the market when formulating our TRIANGLE® inks. In some cases color compatibility is a must whereas in other situations formulas with greater color gamut compared to the OEM's are requested. Application-savvy INX Digital people not only know digital inks, but also the nuances of different equipment-crucial know-how that helps operators achieve color quality and consistency, and get jobs out the door. Our technicians are happy to provide assistance with ICC profile generation, creation of custom color profiles, or even provide a full color management training program for large printing operations.

Order Codes AMERICAS	Order Codes	Service Description	
18000FSDR	18900FSDR	Field service daily rate	
18000FSST	18900FSST	Field service straight time (hourly)	
18000FOT	18900FOT	Field service overtime	
18000FSDT	18900FSDT	Field service double-time

COLOR PROFILING

Order Codes AMERICAS	Order Codes	Service Description	
18000CPID	18900CPID	ICC Profile Generation (IDI)	
18000CPOS	18900CPOS	Custom Color Profile (on site)	

3 DAY COLOR MANAGEMENT TRAINING PROGRAM

We offer a three day training program that is designed to provide digital print customers with the fundamentals required to drive their workflow more efficiently. In this three-day course, customers will receive basic training on printer calibration, color management strategy, and expectation management. Basic program includes:

▼ 2.0-day printer calibration and characterization
- 2 production machines
- 2 medias each (total of 4)

▼ 0.5-day workflow and color management strategy
- Color Management in Adobe® Creative Suite®
- Evaluating color on the display
- Understanding Color Management Fundamentals

▼ 0.5-day expectation management
- Communicating color internally (prepress to production)
- Communicating color to your customers (delivery)
- Communicating color to your customers (sales)

2-DAY COLOR MANAGEMENT TRAINING PROGRAM

More complex sites (multiple printer brands and RIP's) might require extra days to offer assistance in locking down the color process, standardization and managing production variables. We offer the following extras beyond the basic program:

▼ 2.0-day printer calibration and characterization
- 2 production machines

▼ 0.5-day workflow and color management strategy
- Color Management in Adobe® Creative Suite®

▼ 0.5-day expectation management
- Communicating color internally (prepress to production)

*This program requires a pre-qualification process, including preliminary interview and evaluation of print conditions through basic test files. Requires two weeks advanced notice. Requested travel within two weeks may be subject to a rush charge of $800.

Order Codes AMERICAS	Order Codes	Service Description	
7768	7768	On-site service	
7765	7765	On-site expenses	
7796	7796	Phone support (1 year contract)	

FIELD SERVICE

Onsite technician to perform preventative maintenance or repair service on printers currently installed with TRIANGLE® ink. Technician to evaluate printer condition and then identify and perform required service. Field service technicians have access to INX Digital's extensive Parts Program, which can be purchased separately.
MARKETING

Need marketing collateral or design work? We can help! The INX Digital Global Marketing Team works together to create ad campaigns, product literature (data sheets and sell sheets), electronic advertisements, newsletters, email blasts and more to promote our TRIANGLE® brand as well as specific product messages. There are many types of collateral we produce that could easily be put to use within your own company's marketing strategies, whether you keep everything the same or make simple modifications. For more information on ways our team can help yours, please email: IDImarketing@INXdigital.com.

PRINT ADVERTISEMENTS:
Interested in using one of our ads? We are happy to replace our contact information and website address with your own details and provide electronically!

ELECTRONIC ADVERTISEMENTS:
Did you like something you saw from us that came through electronically that you want to use? Ask! We can quickly and easily change the contact information and website address with your own details and provide electronically!

PRODUCT LITERATURE:
Need data/sell sheets for an upcoming event or to send out via email to potential customers? Register with smartINX.com and get access to all of our TRIANGLE® sell sheets for the entire product line! Need them customized with your company's contact details and logo? No problem, we can help you with that!

TRADESHOWS:
Are you participating in an upcoming tradeshow that includes TRIANGLE® products as a highlight of your exhibit? We can offer assistance with your planning!
- Booth design
- Banner/Graphic design
- Labeled, empty display bottles
- Tradeshow bags
- Logo pens

SAMPLE PRINTS:
Need printed samples from a specific printer using TRIANGLE® inks to show prospective clients? We can help you with this! Our marketing group is happy to help coordinate printed samples with our applications lab.

HTML NEWSLETTER:
Looking for a fast and effective way to reach lots of customers at a low cost? Let us help you customize one of our newsletter templates so you can get the word out about TRIANGLE® products!
